ACCURA
SCIENTIFIC LLP
CLEANROOM & CELL CULTURE CONSUMABLES

COMPANY PORTFOLIO · 2026

Reliable scientific consumables for critical applications.

Cleanroom, cell culture, life science, laboratory, safety and hospital supplies — sourced from qualified manufacturers and delivered with the documentation your work demands.

01 AT A GLANCE

One documentation-led partner for the consumables that laboratories, manufacturers and hospitals depend on.

6	190+	7	7
Product verticals	Product categories catalogued	Core industries served	Document types supplied where applicable

Who we are

The Accura Scientific LLP is a Thane-based supplier of scientific, life-science and healthcare consumables. We partner with laboratories, pharmaceutical, biotechnology, healthcare and research organisations that need specified products, delivered consistently.

What we supply

Six verticals — cleanroom, cell culture, life science reagents, labware & instruments, safety & cleanroom protection, and hospital consumables & equipment — so customers can consolidate sourcing with a single, accountable partner.

How we are different

Every engagement starts from the customer's technical requirement. Products are sourced from qualified manufacturers, evaluated against specification, and supplied with COA, TDS, SDS and lot information where applicable.

Our promise

Consistent quality, dependable availability and responsive support — with enquiries answered within one business day.

02 ABOUT US

A partner for scientific and life-science consumables — built on understanding the customer's technical need.

The Accura Scientific LLP provides cost-effective, quality-focused consumable solutions. Rather than pushing a fixed catalogue, we start with the application: what the product must do, the specification it must meet, the volumes involved and the budget available. We then source from reliable manufacturers and qualified suppliers, and back each product with the documentation that regulated and research environments require.

Our range spans controlled-environment consumables, cell culture plasticware, life-science reagents, general labware and instruments, personal and site safety, and hospital consumables and equipment — giving customers one point of contact across categories that are usually spread across many vendors.

OUR VISION

To become a trusted scientific consumables partner for laboratories, pharmaceutical, biotechnology, healthcare and research organisations.

OUR MISSION

To provide quality products, competitive pricing, reliable supply and responsive technical support to our customers.

OUR LONG-TERM GOAL

To build lasting relationships with customers, manufacturers, distributors and technology partners — in India and internationally.

COMPANY

The Accura Scientific LLP

HEADQUARTERS

Thane (W), Maharashtra, India

FOCUS

Scientific, life-science & healthcare consumables

CUSTOMERS

Laboratories, pharma, biotech, healthcare, research, manufacturing

VALUES

Integrity · Quality · Innovation · Customer satisfaction

03 LEADERSHIP

Led by healthcare experience — so we understand what reliability means at the point of use.

PB

Dr. Pandurang Bhosle

Founder, The Accura Scientific LLP

10+

years in the hospital & healthcare sector

Partner

Jeevan Hospital

Dr. Pandurang Bhosle is an accomplished healthcare professional with more than ten years of experience across the hospital and healthcare sector. His extensive exposure to hospital operations and patient care has given him a strong understanding of the healthcare ecosystem — clinical practice, hospital management, patient requirements and the importance of uncompromising standards of quality and service.

He is also a Partner at Jeevan Hospital, where his expertise supports the hospital's ongoing commitment to quality healthcare. That long-standing, practical involvement gives him first-hand insight into the challenges and evolving needs of modern healthcare.

At The Accura Scientific LLP, his vision is to develop and deliver reliable, quality-driven and innovative solutions for the healthcare and scientific community.

Integrity
Transparent specifications and honest advice

Quality
Products matched to defined standards

Innovation
Better solutions as needs evolve

Customer satisfaction
Long-term relationships over one-off orders

04 PORTFOLIO OVERVIEW

Six verticals, one standard of quality — consolidating categories usually spread across many vendors.

	VERTICAL	PRODUCT GROUPS	CATEGORIES	PAGE
A	**Cleanroom Consumables** Low-lint swabs, wipes and control consumables for classified environments up to ISO Class 5.	Swabs, Wipes & wipers, Personal & area control, Documentation & packaging	15	07
B	**Cell Culture Consumables** Sterile plasticware for growing, handling, assaying and storing cells.	Culture vessels, Liquid handling, Tubes & cryostorage, Media & reagent storage	13	08
C	**Life Science Reagents** Reagents and kits spanning genomics, protein research and cell biology.	Genomics & molecular biology, Protein research, Cell biology, Core reagents	13	09
D	**Labware & Instruments** Glassware, liquid handling, equipment and bench essentials for the complete laboratory.	Glassware & vessels, Liquid handling & fluid transfer, Heating, cooling & mixing, Separation & purification, Chemistry & synthesis, Life science & molecular tools, Measurement & analysis, Bench tools & lab essentials	116	10
E	**Safety & Cleanroom Protection** PPE, cleanroom apparel and site-safety systems that protect people and product.	Personal protective equipment, Cleanroom apparel & essentials, Industrial & site safety	22	11
F	**Hospital Consumables & Equipment** Patient care, diagnostic, emergency and hygiene products for hospitals and home care.	Patient mobility & care, Clinical & diagnostic, Consumables & emergency, Facility safety & hygiene	17	12
	Total		196	

Category counts reflect the current catalogue. Additional products and specifications are available on request.

Why breadth matters

A single qualified partner across cleanroom, laboratory and healthcare categories means fewer vendor audits, consolidated documentation and simpler procurement.

05.1 PRODUCT VERTICALS

A

Cleanroom Consumables

Low-lint swabs, wipes and control consumables for classified environments up to ISO Class 5.

PRODUCT CATEGORIES	PRODUCT GROUPS	TYPICAL USERS
15	4	Pharma & biotech manufacturing, medical devices, electronics & semiconductor

Swabs 3

- Polyester swab — standard head
- Polyester swab — large head
- Foam swab — open-hole head

Wipes & wipers 5

- Polycellulose wipes
- Polyester wipes
- Knitted cleanroom wipers
- Non-woven wipes
- Sterile cleanroom wipes

Personal & area control 4

- Cleanroom gloves
- Cleanroom face masks
- Cleanroom shoe covers
- Sticky mats

Documentation & packaging 3

- Cleanroom bags
- Cleanroom paper
- Cleanroom ESD consumables

Featured: cleanroom swabs

PRODUCT	WIPE HEAD	HANDLE	ENVIRONMENT
Polyester swab — standard	Double-layer polyester	Notched, light-green polypropylene	ISO Class 5
Polyester swab — large	Large, double-layer polyester	Light-green polypropylene	ISO Class 5
Foam swab	Open-hole foam	Light-green polypropylene	ISO Class 5

05.2 PRODUCT VERTICALS

B

Cell Culture Consumables

Sterile plasticware for growing, handling, assaying and storing cells.

PRODUCT CATEGORIES	PRODUCT GROUPS	TYPICAL USERS
13	4	Biotech, research institutes, diagnostics, contract research

Culture vessels 5

- Cell culture flasks
- Cell culture dishes
- Multi-well cell culture plates
- Ultra-low attachment multi-well plates
- 96-well ELISA plates

Liquid handling 2

- Serological pipettes
- Cell scrapers

Tubes & cryostorage 4

- Centrifuge tubes
- Micro centrifuge tubes
- Bio-reaction centrifuge tubes
- Cryogenic vials

Media & reagent storage 2

- Reagent bottles
- Square media bottles

Built for sterile workflows

From seeding in flasks and multi-well plates to spheroid work in ultra-low attachment plates, assays in 96-well ELISA plates and long-term storage in cryogenic vials — the full cell culture workflow from one source.

05.3 PRODUCT VERTICALS

C

Life Science Reagents

Reagents and kits spanning genomics, protein research and cell biology.

PRODUCT CATEGORIES	PRODUCT GROUPS	TYPICAL USERS
13	4	Research & academia, biotech R&D, diagnostics

Genomics & molecular biology 3

- Functional genomics & RNA
- PCR & amplification
- Molecular biology

Protein research 4

- Antibodies
- Western blotting
- Proteomics & protein expression
- Enzymes, inhibitors & substrates

Cell biology 4

- Cell culture
- Cells & cell-based assays
- Cell signaling & neuroscience
- Hematology & histology

Core reagents 2

- Biochemicals & reagents
- Buffers

Reagents to specification

Tell us the target, application and format; we source matched reagents and kits with the supporting technical and safety documentation.

05.4 PRODUCT VERTICALS

D

Labware & Instruments

Glassware, liquid handling, equipment and bench essentials for the complete laboratory.

PRODUCT CATEGORIES	PRODUCT GROUPS	TYPICAL USERS
116	8	QC & analytical labs, chemistry, research & academia

Glassware & vessels 20

Beakers · Flasks · Glassware · Glassware kits · Bottles & caps · Ampules · Containers · Crucibles · Cylinders · Dishes · Funnels · Burettes · Volumetric · Condensers · Pressure vessels · Stoppers · Septa · Tubes · Storage · Mortar & pestle

Liquid handling & fluid transfer 12

Pipettes, pipettors & tips · Liquid handling · Dispensers · Syringes & needles · Pumps · Tubing · Tubing connectors · Valves & stopcocks · Flowmeters · Adapters · O-rings · Drum accessories

Heating, cooling & mixing 12

Heating · Ovens · Baths & circulators · Cooling & cryogenics · Stirrers · Shakers & vortexers · Rockers & rollers · Homogenizers · Dispersers · Mills · Ultrasonics · Boiling media

Separation & purification 12

Centrifugation · Chromatography · Filtration · Distillation · Evaporators · Extractors · Dialysis · Sieves & sieve shakers · Solvent purification · Sublimation · Magnetic separation · Vacuum equipment

Chemistry & synthesis 12

Flow chemistry · Peptide synthesis · Photochemistry · Green chemistry · Air-sensitive · Glove boxes · Glove bags · Gas equipment · Fume hood · Liposome factory · Material science equipment · NMR solvents, tubes & accessories

Life science & molecular tools 13

Antibodies · Antibody / immunology supplies · PCR supplies · Cell culture supplies · Molecular biology supplies · Electrophoresis equipment · Electroporation · Hybridization · Histology & staining · Microbiology equipment · Microscopy · Latex & glass beads · Kodak imaging products

Measurement & analysis 11

Weighing balances & accessories · pH supplies · Conductivity meters · Dissolved oxygen · Measurement · Multimeters · Temperature · Timers · Melting point apparatus · Spectroscopy supplies · Indicator paper, strips & kits

Bench tools & lab essentials 24

Forceps & tweezers · Scalpels, scissors & shears · Spatulas & scoops · Knives & cutters · Tongs · Tools · Clamps & supports · Racks · Bench protection · Labels & markers · Tapes · Adhesives · Greases & lubricants · Films & foils · Bags · Wipers · Cleaners · Gloves · Safety equipment · Lights · Batteries · Notebooks & clipboards · Books & software · Computer software

Full range available on request — share your list and we will match specifications and quote.

05.5 PRODUCT VERTICALS

E

Safety & Cleanroom Protection

PPE, cleanroom apparel and site-safety systems that protect people and product.

PRODUCT CATEGORIES	PRODUCT GROUPS	TYPICAL USERS
22	3	Manufacturing sites, cleanrooms, laboratories, industrial facilities

Personal protective equipment 10

- Body protection
- Hand protection
- Powder-free nitrile gloves
- Respiratory protection
- Masks
- Head & face protection
- Eye protection
- Foot protection
- Disposable shoe covers
- Hair nets

Cleanroom apparel & essentials 8

- Cleanroom garments
- Cleanroom disposable coveralls
- Cleanroom shoes
- Cleanroom lint-free wipes
- Cleanroom notebooks
- Cleanroom furniture
- Sticky mats
- Forceps & tweezers

Industrial & site safety 4

- Lock-out / tag-out
- Gas detection instruments
- Safety torches
- Fall protection & rescue systems

Protecting people and product

The same partner that supplies your cleanroom consumables can equip the people who work in it — garments, gloves, masks and footwear — alongside site-safety systems such as lock-out/tag-out and gas detection.

05.6 PRODUCT VERTICALS

F

Hospital Consumables & Equipment

Patient care, diagnostic, emergency and hygiene products for hospitals and home care.

PRODUCT CATEGORIES	PRODUCT GROUPS	TYPICAL USERS
17	4	Hospitals, clinics, nursing & home healthcare, diagnostic centres

Patient mobility & care 6

- Mobility & walking aids
- Patient transfer & lifting
- Hospital beds & furniture
- Toilet, bathroom & personal care
- Home healthcare & elderly care
- Physiotherapy & rehabilitation

Clinical & diagnostic 5

- BP, monitoring & diagnostic devices
- Oxygen & respiratory care
- Surgical & procedure equipment
- Laboratory & sample collection
- Equipment

Consumables & emergency 3

- Medical consumables
- Wound care & dressing
- Emergency & first aid

Facility safety & hygiene 3

- Hospital waste management & hygiene
- Fall protection & rescue systems
- Additional useful products

Grounded in hospital practice

This range is shaped by leadership's first-hand experience of hospital operations — covering patient care, diagnostics, emergency readiness and facility hygiene.

06 QUALITY & DOCUMENTATION

Documentation is part of the product — not an afterthought.

Regulated and research environments need evidence, not just goods. Where applicable, every product is supplied with the records your QA, validation and procurement teams ask for.

COA	**Certificate of Analysis** Confirms the tested lot meets its stated specification.	TDS	**Technical Data Sheet** Material, dimensions and performance data for selection and validation.
MSDS / SDS	**Safety Data Sheet** Hazard, handling, storage and disposal information.	SPEC	**Product Specifications** Defined technical parameters agreed before supply.
QC	**Quality Certificates** Manufacturer quality-system and product certificates.	STER	**Sterilization Documentation** Method and certification records for sterile products.
LOT	**Lot Information** Batch and lot traceability for every consignment.		

BEFORE SUPPLY
Specifications are defined and agreed; samples and documentation are evaluated against your requirement.

AT SUPPLY
Products ship with the agreed documentation pack and lot information for traceability.

AFTER SUPPLY
Consistent repeat supply against the same specification, with responsive support on any query.

07 WHY THE ACCURA

More than a product — a dependable supply chain.

01

Quality focused

We focus on products with defined technical specifications and appropriate quality documentation.

- Specifications agreed up front
- Documentation pack where applicable
- Sample evaluation before scale-up

02

Competitive pricing

Our sourcing strategy delivers competitive solutions for routine and high-volume laboratory requirements.

- Direct relationships with qualified manufacturers
- Pricing suited to repeat and bulk orders
- Fewer vendors to manage

03

Reliable supply

Established manufacturing and supply partners give dependable supply channels.

- Consistent, repeatable supply
- Qualified alternates where needed
- Planning support for recurring demand

04

Customer focused

Laboratories and manufacturers need more than a product — they need consistent quality, availability and responsive support.

- Technical understanding of the application
- Response within one business day
- Ongoing post-supply support

Need a consumable matched to your specs?

Share your specification or current product and we will propose qualified options, with samples and documentation for evaluation.

08 INDUSTRIES WE SERVE

Wherever precision is non-negotiable.

Our verticals map to the needs of seven core industries. The matrix shows where each range is most relevant.

INDUSTRY & TYPICAL NEEDS	CLEAN-ROOM	CELL CULTURE	LIFE SCIENCE	LABWARE	SAFETY	HOSPITAL
Pharmaceutical Contamination control, QC labs and documented supply for regulated production.	●	●	○	●	●	
Biotechnology Cell culture, reagents and consumables for R&D and bioprocess work.	○	●	●	●	○	
Healthcare & Diagnostics Hospital supplies, sample collection and diagnostic consumables.		○	●	●	○	●
Research & Academia Broad catalogue depth for teaching, research and core facilities.	○	●	●	●	○	
Medical Devices Cleanroom assembly consumables, PPE and controlled packaging.	●			○	●	○
Electronics & Semiconductor ESD-safe and low-particle consumables for clean manufacturing.	●			○	●	
Contract Research Flexible, multi-category sourcing for project-driven laboratories.	○	●	●	●	○	

● Core fit ○ Relevant Indicative — other industries are welcome to get in touch.

09 HOW WE WORK

A four-step process that turns a requirement into reliable, repeatable supply.

01 Understand	02 Source	03 Qualify	04 Supply
Your application, specifications, quantities and budget.	We identify suitable products and manufacturing partners.	Specifications, samples and documentation are evaluated.	Consistent supply, competitive pricing and ongoing support.
You share: application, current product, volumes, timelines	We propose: matched options with specifications	You receive: samples and documentation pack	Ongoing: scheduled supply and responsive support

What we need from you

Application, specification or current product reference, expected quantities, delivery timelines and target budget.

What you get from us

Matched options, samples where applicable, the documentation pack, competitive pricing and a single point of contact.

10 PARTNER WITH US

Flexible ways to work together — from a single specification to long-term partnerships.

01

Product enquiries

Single-product or specification-matched requests across all six verticals.

02

Bulk supply

Volume and recurring requirements for laboratories and manufacturing sites.

03

OEM / private label

Products sourced and supplied under your own brand.

04

Distribution

Partnerships with distributors and channel partners.

05

Institutional supplies

Hospitals, universities, research institutes and government bodies.

06

Export

Supply to customers beyond India.
